API Development and Testing

- Postman

OBJECTIVE

A recent computer science graduate with a strong foundation in Java, C++, DSA and Problem Solving. Eager to apply my technical skills and knowledge to real-world software development projects. Possess excellent communication, problem solving, and analytical skills. Proactive, self-motivated, and always willing to learn and grow in a fast-paced environment.

Committed to delivering high-quality software solutions that meet company needs and expectations. Seeking a challenging software engineer role where I can make a positive impact while continuously developing my skills.

PROJECTS (ON GITHUB)

Travel Management System | Project | Source Code

- Designed & Developed a System based App with back- end on **MY SQL & JDBC** & front- end **Java AWT & Java Swing**.
- Added feature for user to **Login** and **Sign up** into the app and select their dream destination according to **the budget** they are giving then select **the hotels** from that **destination** after that all there details and there purchase history can be seen to user and all the information stored inside the **MY SQL**.

Quiz Application | Project | Source Code

- Designed & Developed a System based App with back- end on **MY SQL & JDBC** & front- end **Java AWT & Java Swing**.
- In this project we added a feature where user Input there name and roll number and the quiz starts with 30 sec timer for each question score will be stored inside the MySQL.

ACHIEVEMENTS

- Hacker Rank : Java(4 Star), SQL(4 Star)
- Leetcode : (Solved nearly 120+ DSA Question)

ADDITIONAL INFORMATION

- Communication Skills
- Teamwork
- Emotional Intelligence.

LANGUAGE PROFICIENCY

- Hindi
- English
